WHAT WILL YOU LEARN?

TRIMESTER 1

Develop essential skills in strategic information systems, project management, and data management, building a foundation for effective decision-making.

• Strategic Information Systems Planning

You will learn to critically evaluate current systems, identify opportunities, and develop tailored solutions for complex challenges in business settings.

• Information Systems Analysis and Design

You will learn to evaluate data models, apply user-centered design, and implement various SDLC methodologies.

• Database Management Systems

You will explore data warehousing and business intelligence by developing skills in database design, SQL querying, and data security, emphasising ethical and cultural considerations, including Māori data ownership under Te Tiriti o Waitangi.

• Research Methods

You will have the opportunity to learn about Kaupapa Māori research frameworks and ethical considerations for working with indigenous communities.

TRIMESTER 2

Explore business strategy, data warehousing, and analytics, learning to transform raw data into strategic business solutions.

• IT Project Management

You will gain expertise in project planning, budgeting, scheduling, and risk management, learning to select and apply the right project management methodologies, such as Agile, Waterfall, and PRINCE2.

• Business Strategy and Direction

You will gain a comprehensive understanding of core business principles and management practices, particularly for students without traditional business backgrounds.

• Business Data Analytics with Visualisation and Decision-Making

You will learn to extract insights from complex datasets, create impactful data visualisations, and integrate findings into business decision-making.

• Business Intelligence and Data Warehousing

You will learn methods for managing large datasets, data modelling, and transforming raw data into actionable business insights.

TRIMESTER 3

Conclude with a hands-on capstone project where you'll apply your business analytics knowledge to a real-world problem. This project is designed to enhance your analytical skills and prepare you for a career in data analytics.

SOFTWARE

Throughout your study you will use a range of open-source software. Yoobee will also offer subscriptions with IEEE Xplore, computer society digital library (CSDL) and O'Reilly digital media.

IEEE Xplore®
Digital Library

O'REILLY®

EQUIPMENT

You are required to bring your own device. This allows flexibility of study outside of class hours. If you do not own your own device, please discuss this with one of our team at enrolment.

Components of your device	Minimum Specs	Recommended Specs
CPU	Intel Core i5, or better	Intel Core i5, or better
Memory	8 GB	16 GB
Disk	256 GB SSD	512 GB SSD
Screen Resolution	1280 x 800	1920 x 1080

Entry Requirements

Job Opportunities

DEMAND FOR BUSINESS ANALYSTS

Demand for business analysts is high due to:

- Public and private sector employers who need business analysis skills.
- The need for skilled business analysts in the IT sector.

Driven by the global growth in **digital transformation initiatives**, the increasing adoption of **data-driven decision-making**, and the rising demand for business analysts across industries such as finance, government, technology, healthcare, and infrastructure.

THE FUTURE OF BUSINESS ANALYTICS

Looking ahead, the advancement of AI, Big Data, and Cloud Computing will amplify the need for business analysts who can integrate these technologies into business strategies. Business analysts are projected to experience **sustained demand**, offering lucrative and dynamic career paths in New Zealand.

Note: campus availability might be subject to change in each intake. International Tuition and Resource fees are in New Zealand Dollars and include GST.
